BREEDING LICENCE 2017

DAEN C. - 200900117 (BEART 411 X ANTON 343)

Drachten, 8th of February 2017

Dear Mr. Beblot,

Herewith we declare that the stallion Daen C. received again a breeding license for 20 mares within Poland for the breeding seasons 2017 .

At the inspection in 2017 we need to see Daen C. again and as much as possible of his offspring. We take an look at the number and quality of his offspring and of course Daen C. him self. Please note that the stallion must cover at least 5 mare's each year.

Report Daen C. inspection 2016

Daen C. is an good developed, in good condition stallion with an nice head and neck (slightly heavy) and plenty hair. The beginning of a fallen crest becomes visible. Correct in frame, well proportioned, slightly round croup. The quality of the feet and legs could be an bit better. An bit upright pastern and small hooves and the hock is an bit filled. The walk has plenty of length and engagement of rear quarters. The trot has plenty length, rhythm and suppleness.

9 foals are judged; two 1st premiums / three 2nd premiums / four 3rd premiums so we can say he brings good to average offspring.

I hope I informed you well, when you have more questions please let me know.

Sincerely,

Inspection K.F.P.S.

- After every breeding the stallion owner has to fill in the breeding certificate and send it within 2 weeks after the covering to the K.F.P.S., then you receive the original birth certificate. When we don't receive the breeding papers the horse can only be registered after he got a DNA-test (€ ± 150,-).

You can send it by mail (scan the breeding form) to trijnieduin@kfps.nl.
